

The map displays the contiguous United States with various aviation categories color-coded. The majority of the land area is green, indicating VFR conditions. Pockets of blue (MVFR) are scattered, particularly in the northern and central regions. Red (IFR) and pink (LIFR) areas are concentrated in the Northeast, specifically around New York City and Washington D.C., as well as in the Great Lakes region. Numerical values, often 13000, are printed across the map, likely representing standard pressure altitudes or flight levels. A legend in the bottom right corner, titled 'Aviation Categories', provides the key for the colors: VFR (green), MVFR (blue), IFR (red), and LIFR (pink).
