

The map displays the contiguous United States with state boundaries. The background is colored green, representing VFR (Visual Flight Rules) conditions. There are several blue-colored regions, primarily in the northern and central parts of the country, representing MVFR (Marginal Visual Flight Rules) conditions. These blue regions are irregularly shaped and often follow major water bodies or mountain ranges. Numerous numerical labels are scattered across the map, with '13000' being the most frequent, appearing in both green and blue areas. Other numbers include 3600, 2500, 2100, 1800, 2700, 2600, 3200, 2800, 2900, 3000, 2300, 3500, 3100, 3600, 4000, 3400, 2400, 1400, 8000, 7500, 7000, 11000, 13000, and 800. A legend in the bottom right corner, titled 'Aviation Categories', shows four color-coded boxes: green for VFR, blue for MVFR, red for IFR, and pink for LIFR.
