

The map displays the following aviation categories across the United States:

- VFR (Green):** The majority of the land area is colored green, indicating VFR conditions.
- MVFR (Blue):** Small, irregular patches of blue are visible, primarily in the western and central regions.
- IFR (Red):** No red areas are visible on this map.
- LIFR (Pink):** No pink areas are visible on this map.

Numerical values are printed throughout the map, often within county boundaries. These values range from 1900 to 18000, with 13000 being the most frequent value. These numbers likely represent specific aviation metrics such as ceiling or visibility for each county.
