

The map displays the following aviation categories and flight levels across the United States:

- VFR (Green):** The majority of the map area is designated as VFR.
- MVFR (Blue):** Scattered areas of Marginal Visual Flight Rules are shown, primarily in the central and eastern US.
- IFR (Red):** Areas of Instrument Flight Rules are concentrated in the central and eastern US, often overlapping with MVFR and LIFR regions.
- LIFR (Pink):** Limited areas of Low Instrument Flight Rules are visible, mostly in the central and eastern US.

Flight levels are indicated by numerical values (e.g., 13000, 1300, 1100, 1000, 900, 800, 700, 600, 500, 400, 300, 200, 100) scattered across the map, representing different altitudes or pressures.
