

The map displays the following aviation categories across the United States:

- VFR (Green):** Covers the majority of the land area, including most of the West, Midwest, and Northeast.
- MVFR (Blue):** Found in specific regions, primarily in the Western United States and parts of the South.
- IFR (Red):** Concentrated in the Great Lakes region and parts of the Northeast.
- LIFR (Pink):** Located in the Gulf of Mexico and parts of the Southeast.

State boundaries are indicated by thin black lines, and major cities are marked with black dots. The map also includes a legend in the bottom right corner titled "Aviation Categories" with corresponding color swatches.

The map displays the following aviation categories across the United States:

- VFR (Green):** Covers the majority of the land area, including most of the West, Midwest, and Northeast.
- MVFR (Blue):** Found in specific regions, notably in the Pacific Northwest, parts of the Southwest, and along the Gulf Coast.
- IFR (Red):** Concentrated in the Great Lakes region and parts of the Northeast.
- LIFR (Pink):** Primarily located in the Gulf of Mexico and parts of the Southeast.

State boundaries are indicated by thin black lines, and major cities are marked with black dots. The map also includes a legend in the bottom right corner titled "Aviation Categories" with corresponding color swatches.
